

Some of our **EFFORTS** include:

We consistently look for new ways to make a positive impact

on environmental sustainability. Individuals, organizations and communities all have an obligation and opportunity to reduce their demand on the environment. Our commitment to the environment is inherent to our Mission, Vision and Values!

▼ GREEN INITIATIVES

We consolidated 7 office machines into 3 high efficiency machines.

Recycled cartridges are picked up from our customers and then sent out to be reused or recycled again.

We accumulate old flyers, plastic, catalogs, pallet wrap etc. as waste and have it evaluated by a local disposal company we work with. Whatever is determined to be recyclable, then goes into our cardboard compactor with other recycled cardboard. We call it the "one cycle-recycle" program.

We save more paper by sending out all customers invoices by email and using electronic reports instead of printed purchase orders.

All damaged colored paper is donated to special needs schools.

Winter boots, coats and shoes are collected every fall for clothing drives for the homeless.

Thermostats are turned down when no one is in the office on weekends and on holidays.

The warehouse floor washer is a detergent free system. All that goes down the drain is dirty water.

Warehouse staff reuses pallet wrap for packing customer orders.

We do not idle our trucks while loading or delivering.

Glassware and ceramic plates are used in the lunchroom instead of disposable plates. When disposable plates are used, it's Potato Ware (cutlery and plates made from recycled potato peels).
